

## Nashville/Davidson, TN

The ParkScore index is a national comparison of park systems across the 100 most populated cities in the United States. Published annually, the index measures park systems according to five categories reflective of an excellent city park system: access, investment, amenities, acreage, and equity. While the rankings provide fodder for friendly competition, the goal each year of publishing the index is to help leaders advocate for needed park resources and provide relevant data to inform local park improvement efforts. To facilitate a fair comparison across cities, the index aggregates across all public and private organizations supporting parks in each city.

This year, Nashville/Davidson received a score of 41.9 points out of 100 based on an average of the five categories. There are 14 measures across these categories, with points awarded based on how Nashville/Davidson compares to the other 99 cities for that particular measure.

68

out of 100  
points**Acreage**

The acreage score indicates the relative abundance of large ‘destination’ parks, which include large natural areas that provide critical mental health as well as climate and conservation benefits. There are two components to the acreage score. Of these, Nashville/Davidson scores below average on the percentage of the city’s overall area that is dedicated to parkland (35 out of 100 points), and among the highest on median park size (100 out of 100 points).

28

out of 100  
points**Access**

The access score indicates the percentage of a city’s residents that live within a walkable half-mile of a park – the average distance that most people are willing to walk to reach a destination. With 46% of its population living this close to a park, Nashville/Davidson scores below average in this category.

22

out of 100  
points**Investment**

The investment score indicates the relative financial health of a city’s park system, which is essential to ensuring the park system is maintained at a high level. This value aggregates park and recreation spending across all agencies and organizations within the city, including monetized volunteer hours. In Nashville/Davidson, a total of \$81 per capita is spent each year on publicly accessible parks and recreation, below average for this category.

35

out of 100  
points**Amenities**

The amenities score indicates the relative abundance of six park activities popular among a diverse selection of user groups (kids, teenagers, adults, seniors). Overall for this category, Nashville/Davidson scores below average, though it varies by amenity: basketball hoops (45 points out of 100), dog parks (46 points), playgrounds (29 points), senior and rec centers (44 points), permanent restrooms (27 points), and splashpads (20 points).

57

out of 100  
points**Equity**

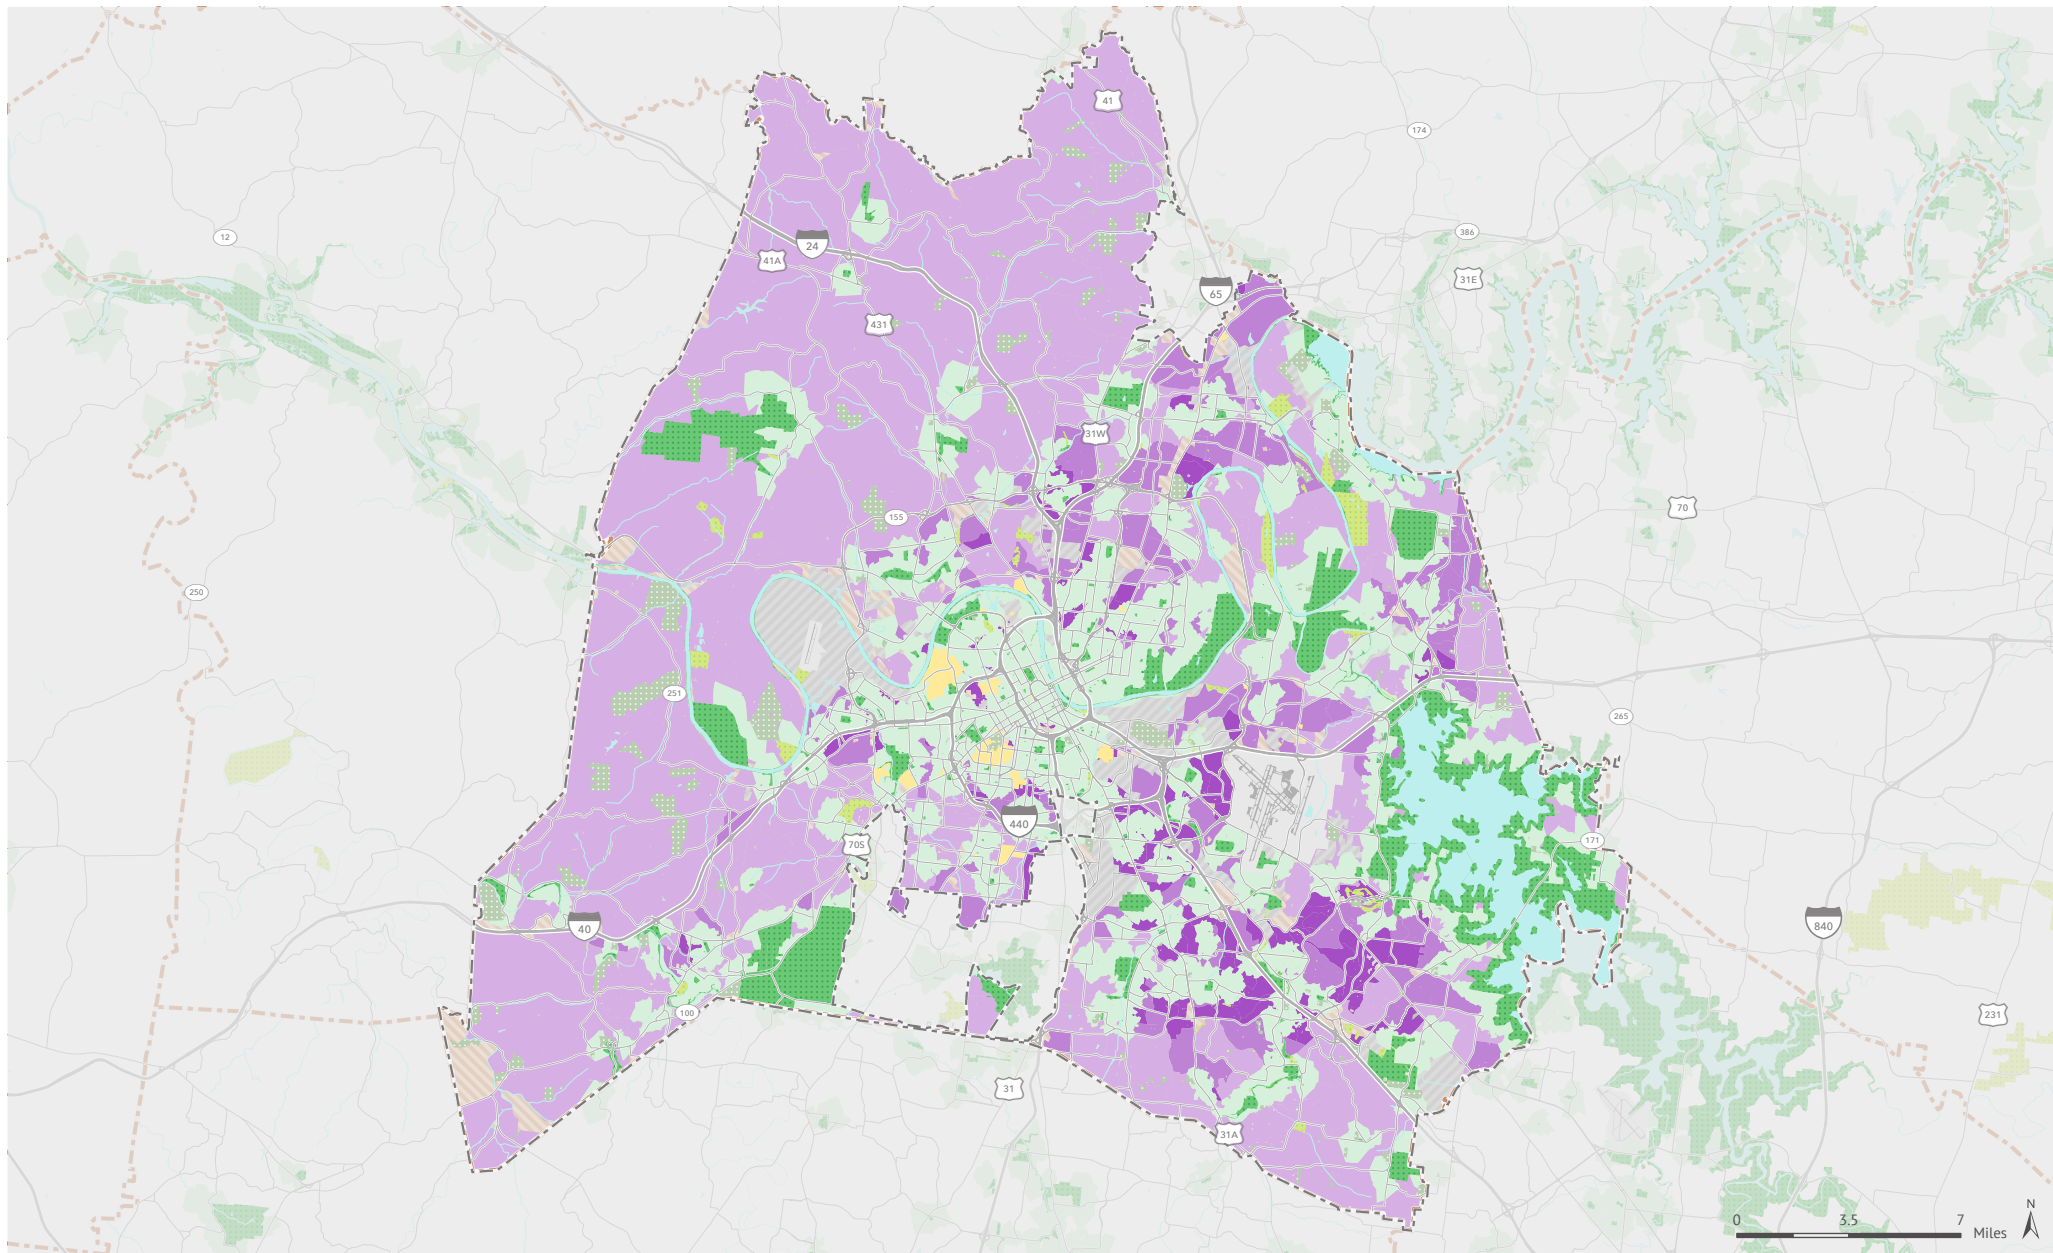

The equity score indicates the fairness in the distribution of parks and park space between neighborhoods by race and income. This category is an average of two types of metrics. On the first set of measures, Nashville/Davidson scores below average: 27 out of 100 points for people of color living within a 10-minute walk of a park and 30 points for low-income households. The second set of measures compare the distribution of park space. In Nashville/Davidson, residents living in neighborhoods of color have access to 5% more nearby park space than those living in white neighborhoods (70 points out of 100). Residents living in lower-income neighborhoods have access to 59% more nearby park space than those in higher-income neighborhoods (100 points out of 100).

Nashville/Davidson, TN

	Values for Nashville/Davidson, TN:			'Per capita' value needed to achieve*:	
	City-wide total	City-wide 'per capita'	City-wide score*	1 pt	100 pts
<b>Acreeage (68 Points)</b>					
Parkland as a percentage of city area	24,831 acres	8.3% of city area	35 points	2.4%	19%
Median Park Size	16.7 acres	16.7 acres	100 points	.58	10.80
<b>Access (28 Points)</b>					
Percent of population within a 10-minute walk of a park with public access		46%	28 points	25%	100%
<b>Equity (57 Points)</b>					
Percent of people of color within a 10-minute walk of a park		45%	27 points	25%	100%
Percent of low-income households within a 10-minute walk of a park		48%	30 points	26%	100%
Residents in neighborhoods of color have _____ park space as those in white neighborhoods		5% more	70 points	92% less	47% more
Low-income neighborhoods have _____ park space as those in high-income neighborhoods		59% more	100 points	90% less	37% more
<b>Investment (22 Points)</b>					
Annual park investment (three-year average)	\$57,484,277	\$ 81 per resident	22 points	\$35	\$248
<b>Amenities (35 Points)</b>					
Basketball hoops	286 hoops	3.97 per 10,000 residents	45 points	.95	7.64
Dog parks	10 dog parks	1.39 per 100,000 residents	46 points	.32	2.63
Playgrounds	166 playgrounds	2.31 per 10,000 residents	29 points	.99	5.63
Senior/Rec centers	28 centers	0.78 per 20,000 residents	44 points	.18	1.55
Restrooms	72 restrooms	1.00 per 10,000 residents	27 points	.17	3.24
Splashpads	5 splashpads	0.69 per 100,000 residents	20 points	.10	3.03

\*For each of the 14 measures, cities are scored on a 1-100 scale (100 is the highest) based on how they compare to the other 99 cities. To adjust for outliers, 100 points is awarded for any city that has more than double the national median for that measure.

# 2024 ParkScore® index: Access

## NASHVILLE, TENNESSEE

The Access category of the ParkScore® index awards points based on the percentage of the population within a 10-minute walk of a public park. This analysis is provided via the ParkServe® mapping application, which identifies the population living within a 10-minute walk of a park by creating dynamic 1/2-mile service areas (10-minute walking distance) for all public parks. In this analysis, service areas use the street network to determine walkable distance (streets such as highways, freeways, and interstates are considered barriers).

In Nashville, 46% of the population lives within a 10-minute walk of a park. Among the remaining 391,192 people without access to a nearby park, Trust for Public Land suggests where to prioritize the development of new parks to reduce this gap. This prioritization is based on a comprehensive index of six equally-weighted demographic and environmental

metrics:

- Population density\*
- Density of low income households (households with income less than 75% of the urban area median income; less than \$50,000 in Nashville)\*
- Density of people of color\*
- Community health (a combined index based on the rate of poor mental health and low physical activity from the 2022 CDC PLACES census tract dataset)
- Urban heat islands (surface temperature at least 1.25 degrees greater than city mean surface temperature from Trust for Public Land, based on Landsat 8 satellite imagery)
- Pollution burden (air toxics respiratory hazard index from 2022 EPA EJScreen)

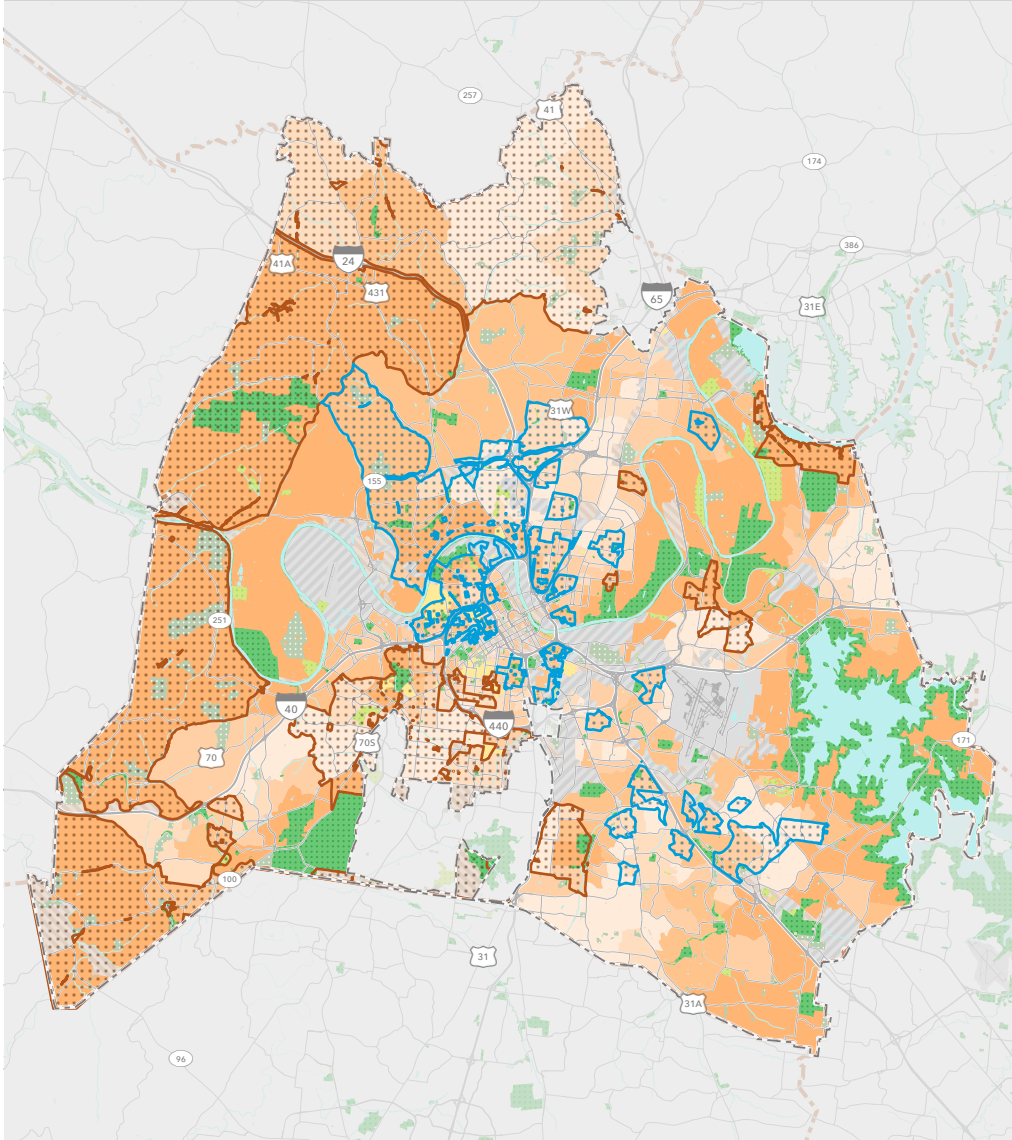

\*Based on 2023 Forecast block groups provided by ESRI

 ■ Block Group with higher % of high-income households

# 2024 ParkScore® index: Equity

## NASHVILLE, TENNESSEE

The Equity category of the ParkScore® index awards points in part based on the difference in nearby park space between neighborhoods in a city:

- On a per person basis, ratio of nearby public park space between communities of color and white communities
- On a per person basis, ratio of nearby public park space between low-income communities and high-income communities

Nearby park space per person effectively measures the available park space within a 10-minute walk of a micro-neighborhood, identified as those with the highest concentrations (top 20% of all census block groups in a city) of people of color or white population and high-income or low-income households. Households with income less than 75% of city median income (less than \$50,000 in

Nashville) are considered low-income; households with income greater than 125% of city median income (greater than \$83,000 in Nashville) are high-income.

In Nashville, neighborhoods of color have 5% more park space than white neighborhoods, and low-income neighborhoods have 59% more than high-income neighborhoods.

The metrics for people of color reflect each of the Census-designated race/ethnicity groups: Black, Hispanic, and Indigenous and Native American, Asian Americans, Pacific Islanders, multiple races, and other communities of color.

Demographic profiles are based on 2020 Forecast block groups provided by Esri.

- Park with public access
- Other park or open space
- Cemetery
- University
- Military
- Industrial
- Vacant zero population area
- City boundary
- County boundary
- Park acres per person
  - Very high
  - High
  - Moderate
  - Low
  - Very low
